

A VERY BARI MINUTE

Featuring: Stellar HD Tilt Wheelchair

Welcome back to A Very Bari Minute, a series all about bariatrics and the specialized equipment that's out in the marketplace today! October's Very Bari Minute product feature is the second wheelchair highlighted in the series **Stellar HD Tilt Bariatric Wheelchair** by PDG Mobility!

Product Highlights

1. Forward Upgraded Front Casters

Like the Eclipse HD Manual Wheelchair, the Stellar HD features adjustable forward upgraded front casters to allow for more weight to be distributed onto the rear wheels, make propulsion easier, and provide better stability to the user.

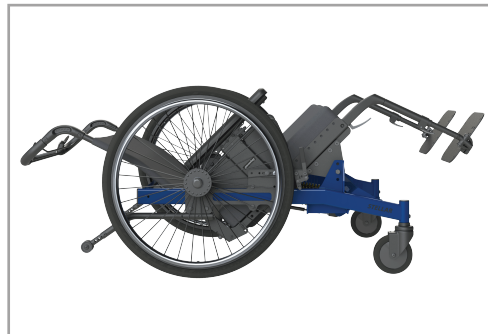

2. Front Tilt

The Stellar also features a front-tilt function. Front-tilting allows for the user's knees to remain low while in tilt and is a great option for users needing to go under surfaces in tilt and for foot propulsion.

Specifications & Features

- Weight Capacity: 600 lbs
- Seat Width: As wide as 32"
- Seat to Floor: As low as 16"
- Degrees of Tilt: 45°
- Multiple gas struts (for easy tilt operation)

Contact HME Home Health's Liam Pickrell for more information on Bariatric equipment.
