

STELLAR

STELLAR

Designed for individuals that require optimal pressure relief and positioning, the Stellar is one of the only manual tilt-in-space wheelchairs that offer up to 45° of tilt while maintaining a low knee rise. Its unique and durable architecture allows the chair to be maneuvered under tables while tilted, letting users participate in normal dining and a wide variety of social activities.

A Easy to Adjust Seat-to-Floor Height

Simple adjustment requiring only four bolts to the adjust seat height.

B Easily Adjustable Axle Position

Allows for fine adjustment of the chair's centre of gravity to allow for more stability and comfort.

C Force Adjustable Gas Struts

Adjustable uplift force to balance the weight of the occupant in the chair, which allows for easy tilt.

D Back Angle Adjustment

Achieve up to 30° of back recline angle change with a single bolt.

Features

45° of manual tilt-in-space	Low seat-to-floor height
Extra wide heavy duty version available (Stellar HD)	Rugged construction for heavy use
Ultra-durable version available (Stellar Impact)	Knees remain low in tilt
Short wheelbase for maneuverability	Transit tie-down (Not available for Stellar HD)
