HME SIGNATURE SERIES

NS² CUSHION

NON-SLIP, NON-SLIDE WHEELCHAIR CUSHION

HME SIGNATURE SERIES NS² CUSHION

Introducing the HME Signature Series NS² (Non-Slip, Non-Slide) Cushion - an innovative foam-based contoured wheelchair cushion offering optimal comfort, support, and longevity to elevate your mobility experience and deliver exceptional relief.

The HME Signature Series NS² Cushion is designed and manufactured in Canada exclusively for HME Home Health.

DESIGN & COMPOSITION

The design and composition of the NS² Cushion features an anti-slip cover that prevents the pelvis from sliding forward and provides lateral support to improve balance and postural stability, while optimally aligning the lower limbs.

LARGER CONTACT SURFACE

Designed with a larger contact surface, the NS² Cushion provides a controlled and balanced weight distribution and reduces pressure on bony prominences.

DISPERSION FOAM

With a layer of dispersion foam in the posterior well, the NS² Cushion provides a deeper immersion of the ischial tuberosity to ensure optimal comfort.
