

NEOX™ Tilt-in-Space Wheelchair

The NEOX™ is a tilt-in-space wheelchair designed to provide exceptional positioning, stability, and maneuverability. Its highly adjustable design allows for a customized fit to meet a wide range of user needs.

Features

- Up to 45° of tilt for positioning and pressure relief
- Six-wheel configuration improves stability and maneuverability
- Highly adjustable seat width, depth, and height for a customized fit
- Constant Seat-to-Floor (CSF) option supports foot propulsion while tilted
- Optional dynamic backrest helps manage involuntary movements
- Available in a variety of frame colours
