

HME™ **NXT Biofit Wheelchair Cushion**

The NXT BioFit Wheelchair Cushion is designed to provide advanced positioning, pressure redistribution, and skin protection for users at medium to high risk of skin breakdown.

MSRP
\$625.00

Features

- Multi-layer cushion design promotes immersion, support, and pressure redistribution.
- Pre-ischial support helps prevent sliding and improves pelvic positioning.
- Moderate abductor/adductor contour supports mid-line femur alignment.
- Rear radius provides sacral support and compatibility with modular back supports.
- Beveled front edge accommodates tight frame angles and limited hamstring flexibility.
- Soft density top layer enhances comfort and immersion.
- Blue Visco Gel Foam helps reduce heat buildup and support skin integrity.
- Medium density Visco Foam improves positioning and stability.
- Firm HR moulded base layer delivers durability and support with SIT Technology®.
