

NXT Xtend Height Adjustable Thoracic Back Support

The NXT Xtend Height Adjustable Thoracic Back Support is designed to provide adjustable trunk support, positioning, and comfort for users who require additional thoracic stability. Its height-adjustable design allows clinicians to easily adapt the support as user needs change.

Features

- Height-adjustable design with 4" of built-in adjustment
- Adjustable upper section provides customized thoracic support
- Fixed lower section promotes pelvic stability
- Deep lateral contours available for enhanced positioning (DEEP models)
- Lightweight aluminum shell for durability and reduced weight
- SmartGEL® infused foam enhances comfort and temperature management
- Washable antimicrobial cover helps maintain hygiene

Specifications

- Shell: Two-piece lightweight aluminum shell
- Cushion: Dual-density foam with smartGEL® infused visco technology
- Cover: Washable antimicrobial spacer mesh cover
- Mounting: QuickFit Mounting System with one-hand quick release

Available Accessories

- External Lateral Supports
- Incontinent infection control covers
- Head supports
- Replacement cover and foam
