

HMETM OpalAir Turn Surface

The OpalAir Turn Surface is designed to help prevent and manage pressure injuries through a combination of lateral rotation therapy, alternating pressure, and low air loss technology. Its advanced features support pressure redistribution, moisture management, and positioning for a wide range of care needs.

MSRP
\$9,995.00

Specifications

- Therapies: Lateral rotation, alternating pressure, and low air loss
- Setup: Auto-Detect pressure adjustment system
- Application: Pressure injury prevention and management
- Suitable For: Standard and bariatric care environments**

Features

- Combines lateral rotation therapy, alternating pressure, and low air loss technologies
- Helps reduce pressure and support skin integrity
- Assists with positioning and caregiving activities
- High airflow system helps manage heat and moisture
- Suitable for bariatric and high-risk users
- Auto-Detect technology simplifies setup and maintenance
