

P903 Standard Bed

The P903 Standard Bed is a fully electric long-term care bed designed to provide advanced positioning, safety, and comfort for users and caregivers. Its expandable design, ultra-low height range, and high weight capacity make it suitable for a wide range of care environments.

Features

- Fully electric bed with auto-contour and cardiac chair positioning
- Ultra-low to high height range supports safe transfers and caregiving
- Expandable width and length accommodate changing user needs
- Hand pendant control with backlit display for easy operation
- Under-bed LED lighting enhances nighttime safety
- Heavy-duty caster and locking system provides stability and mobility
