

Proactive Bed Alarms

The Proactive Bed Alarm is designed to help monitor patient movement and reduce the risk of falls and wandering. Its simple, reliable design provides caregivers with enhanced safety monitoring in home care and facility environments.

Features

- Compatible with most bed sensor pads, floor pads, and seatbelt attachments
- Auto-reset function automatically re-arms the alarm when pressure is reapplied
- Visual and audible alerts help improve monitoring and response
- Adjustable tone, volume, and delay settings for customized use
- Tamper-resistant design helps prevent unauthorized adjustments
- Durable housing with mounting options for beds and wheelchairs
