

The Quickie® IRIS™ is a tilt-in-space wheelchair designed to provide positioning, pressure relief, and stability. Its rotation-in-space technology promotes smooth tilting and improved maneuverability.

Features

- Rotation-in-space design provides smooth, stable tilt and positioning
- Available with up to 60° of tilt for enhanced pressure relief and postural support
- Low seat-to-floor height supports foot propulsion when needed
- Cable-free tilt actuator simplifies operation and maintenance
- Adjustable stroller handles accommodate different caregiver heights
- Wide range of seating and positioning options available

Specifications
