

ROHO Hybrid Elite Cushion

The ROHO Hybrid Elite Cushion combines air-cell technology with a contoured foam base to provide skin protection, pressure redistribution, and advanced positioning support. It is designed for users who require high levels of stability while maintaining the pressure-relieving benefits of ROHO's air flotation system.

Features

- Combines ROHO air-cell technology with a contoured foam base
- Provides excellent pressure redistribution and skin protection
- Promotes pelvic alignment and sitting stability
- Supports immersion and envelopment of the ischial tuberosities and greater trochanters
- Helps minimize tissue deformation and improve blood flow
- Adjustable air cells allow customization to the user's shape and seating needs
- Designed for users with high positioning requirements

Specifications

- Weight Capacity: 500 lbs (227 kg)
- Material: Contoured foam base with ROHO dry flotation air cells
- Positioning: High
- Pressure Redistribution: Moderate to High
- Thickness: Approximately 2" at leg troughs and 4" at pommel/abductor
- Custom Sizes: Not available

Available Sizes

- Width: 14", 15", 16", 17", 18", 20", 22", 24"
- Depths: 14", 15", 16", 17", 18", 20"
