

HME™ **ROHO Quadtro Select Cushion**

The ROHO Quadtro Select Cushion is designed to provide advanced pressure redistribution, skin protection, and positioning support. Its adjustable air-cell design allows users to customize the cushion to their individual shape and seating needs for optimal comfort and stability.

Features

- Adjustable air-cell design adapts to the user's shape and weight
- Allows easy adjustments as seating needs change over time
- Provides high levels of pressure redistribution and skin protection
- Supports moderate to high positioning needs
- Lightweight design for easy handling and transport
- Washable cover and cushion for simple cleaning
- Durable neoprene construction can be repaired to extend product life
- ISOFLO® Memory Control allows quick and easy adjustment while seated
