

HME TM **ROHO® Hybrid Select Cushion**

The ROHO® Hybrid Select Cushion combines a contoured foam base with adjustable air-cell technology to provide advanced positioning, pressure redistribution, and skin protection. Its unique design offers enhanced stability and optional offloading capabilities for users with complex seating needs.

Features

- Combines contoured foam support with ROHO air-cell technology
- Provides excellent pressure redistribution and skin protection
- Adjustable air cells conform to the user's shape and positioning needs
- ISOFLO® Memory Control allows easy adjustment and positioning
- Deep leg troughs and contoured base promote stability and posture
- Coccyx cutout helps relieve pressure on the tailbone
- Optional offloading feature allows removal of the IT air insert
- Helps reduce pressure points and improve comfort
- Supports changing positioning needs over time
