BASE

HCPC CODES	K0848, K0849, K0856, K0861
SUSPENSION SYSTEM	Active Ride Control (ARC)
BASE WIDTH	23.25"
BASE LENGTH	36.5"
SEAT-TO-FLOOR HEIGHT	as low as 17"
DRIVE WHEEL SIZE ⁽¹⁾	14"
CASTER WHEEL SIZE (front/rear)⁽¹⁾	6"
TURNING RADIUS	20"
DRIVETRAIN	4-pole EAD Motors

BATTERIES	2 x M34
	3 x M40 option for Vents
BATTERY CHARGER	8A, Off Board
BATTERIES WEIGHT (each)	42 lbs
RANGE ⁽²⁾	17.7 miles
WEIGHT CAPACITY	300 lbs
BASE WEIGHT	157 lbs
GROUND CLEARANCE	3"
MAXIMUM SPEED	5 mph

FENDER COLORS

⁽¹⁾ All X3 wheels come with solid inserts

⁽²⁾ Actual driving range and speed may vary due to factors such as user weight, type and grade of terrain, battery condition & charge level; type and condition of the drive wheels, and variations in the drive and control systems.

ULTRA LOW MAXX POWER POSITIONING SYSTEM

POWER POSITIONING SYSTEMS	SYSTEM DESCRIPTION	HCPC CODE
ULTRA LOW MAXX CG TILT ONLY SYSTEM	up to 50°	E1002
ULTRA LOW MAXX CG TILT AND RECLINE SYSTEM WITH ESR	up to 50° Tilt, 170° Recline with (ESR) Extended Shear Reduction	E1007
ULTRA LOW MAXX CG TILT AND RECLINE SYSTEM WITH PSB	up to 50° Tilt, 170° Recline with (PSB) Power Sliding Back	E1008
ULTRA LOW MAXX RECLINE SYSTEM WITH ESR	170° Recline with (ESR) Extended Shear Reduction	E1004
ULTRA LOW MAXX RECLINE SYSTEM WITH PSB	170° Recline with (PSB) Power Sliding Back	E1005
ULTRA LOW MAXX ELEVATING LIFT SEAT ONLY SYSTEM	12" of Power Seat Elevation	
SEAT WIDTH	11" - 24" width adjustment ranges 11"-15" ⁽¹⁾ , 16" - 20", 19" - 22"	
SEAT DEPTH	11" - 22" depth adjustment ranges 11"-15" ⁽¹⁾ , 16" - 20", 19" - 23"	
ADDITIONAL MODULES	Recline Body Fit; Power Anterior Tilt up to 45°; 5° & 10° Fixed Anterior Assist; 5° Pre-Tilt; 8° or 30° Precline; Single Post Angle Adjustable Fold Down Back; Single Post Manual Recline Back

unique
IN-LINE BATTERY CONFIGURATION

Offers unmatched stability and performance

ROVI Pronunciation: [roh*vee]

From the root word Roving:

“Not restricted as to location or area, capable of moving from place to place”

ultimate
PERFORMANCE

Active Ride Control (ARC) independent suspension system and powerful 4-pole motors work together to provide superior climbing ability and uncompromised stability with a smooth, powerful ride.

optimal
BALANCE

The ROVI X3's unique frame configuration optimizes weight distribution by concentrating the mass through the midline of the power base. This revolutionary configuration provides clients with the industry's narrowest power base without sacrificing stability or performance.

total
CONTROL

The ROVI X3 utilizes well-known PG Drives Technology. This electronics platform delivers both non-expandable and expandable control options with numerous innovative features. ROVI chose this platform for its industry-leading performance, reliability, and ease of programming. The ROVI X3's standard 4-pole motors have been precision matched for peak performance with PG Drives.

Ease of Programming

More than just another pretty face

From inception, Motion Concepts and ROVI have worked side-by-side to create a truly exceptional wheelchair design. Both companies are driven by years of experience and a mutual passion to further our clients' independence, comfort and function. The result of this extraordinary partnership is a power base that blends together outstanding performance and stability with the best power positioning system on the market.

customizable **FENDERS**

- U.S. Military Branch designs
- Customer inspired designs

transport FRIENDLY

- Single Post Angle Adjustable Fold Down Back
- 4-Point Tie Down brackets
- EZ Lock & Q'Straint Ready

new HEIGHTS

- 12" of Power Seat Elevation, Tilt and Recline
- Seat-to-Floor Heights as low as 17"

compact FOOTPRINT

- Mid Wheel Drive for ultimate maneuverability
- Unique Battery configuration for optimal lower extremity positions
- Decreased overall functional length

Good things come in small packages

The unique chassis design and narrow footprint makes ROVI X3 a perfect fit for the power mobility needs of children. The ROVI X3's small size performs extremely well in narrow indoor spaces, and its blend of power and ARC suspension offers optimum performance and stability for active kids in a variety of outdoor applications. When outfitted with Motion Concepts' modular Ultra Low Maxx Pediatric Power Positioning System and Invacare® MatrX® Mini Seating Series, the ROVI X3 becomes the ultimate power solution for kids!

George is a retired electrical engineer who loves to garden and keep up with the latest technology. In his younger days, you could often find George cruising around on his motorcycle or outdoors camping with his friends. Although George has been living with Multiple Sclerosis for nearly 20 years now, it certainly hasn't slowed him down or kept him away from the things he enjoys most. These days, George is able to keep up with his grandchildren and tend to his many plants thanks to the mobility and comfort provided by his ROVI X3 Maxx wheelchair and Matrix seating products.
