

The RS8 Geneva Tub is a height-adjustable bathing system designed for safe, comfortable bathing of highly dependent residents. Its ergonomic design, powered height adjustment, and fast-fill system improve comfort while reducing caregiver strain.

Features

- Keyhole-shaped tub provides extra comfort and support
- Motorized height adjustment for safer caregiver access
- Fast-fill system with anti-scald protection
- Built-in disinfecting system for improved infection control
- Handheld shower wand for easy bathing
- Optional Air Spa and Autofill features
