

Ride Custom 2 Cushion

The Ride Custom 2 Cushion is a custom-molded seating solution designed to provide exceptional skin protection, postural support, and sitting stability. Created using RideWorks® scanning technology, each cushion is tailored to the individual's unique shape to improve comfort, function, and long-term skin health.

Features

- Custom-made to match each user's shape and seating needs
- Lightweight design for easy handling and transport
- Helps protect skin by reducing pressure and shear
- Promotes improved posture, stability, and sitting comfort
- Adjustable with included CAM Wedges for changing needs
- Breathable cover helps keep users cool and comfortable
- Optional comfort upgrades available
- Growable design can be modified as the user grows
- Compatible with Ride back supports for enhanced positioning
