

Ride Forward Cushion

The Forward Cushion is designed to provide pressure redistribution, pelvic positioning, and postural stability for users with mild to moderate postural challenges while helping maintain skin protection.

Features

- Supportive contours surround and stabilize the pelvis
- Promotes improved posture, balance, and sitting control
- Reduces pressure around high-risk bony prominences
- Visco-elastic top layer enhances comfort and pressure redistribution
- Breathable spacer fabric helps keep skin cool and dry
- Fluid-resistant cover design helps prevent moisture absorption
- Adjustable with optional CAM Wedges for customized positioning
- Disassembles easily for cleaning and sanitization
- Available in pediatric and adult contours
