

Ride Java[®] Cushion

The Java[®] Cushion is designed to provide skin protection, pressure redistribution, and sitting stability by reducing pressure and shear forces in high-risk areas while supporting functional performance.

Features

- Redistributes pressure and shear away from high-risk areas
- Promotes sitting stability and functional positioning
- Vented base and breathable cover help manage heat and moisture
- No fit-essential maintenance required
- Approximately 30% lighter than comparable air cushions
- Adjustable with Ride CAM[®] wedges and well inserts
- Machine-washable cover with sanitizable inner cover and base
- Free width and depth modifications available

Specifications

- Weight: 1.7–3.5 lbs (0.8–1.6 kg), depending on size
- Weight Capacity: 300 lbs (136 kg)
- Cover: Breathable spacer mesh cover with incontinent inner cover
- Modifications: Width and depth modifications available at no additional charge
