

Safety Chair EV-4000

The Safety Chair EV-4000 is an emergency evacuation chair designed to safely transport individuals during emergency situations. Its lightweight, foldable design and controlled descent system allow for efficient single-person operation on stairs and uneven terrain.

Features

- Supports safe single-person evacuation of users up to 441 lbs (200 kg)
- Self-braking track system provides controlled stair descent
- Adjustable seating position and head support enhance passenger comfort and safety
- Quick-release 4-point harness secures the occupant during transport
- Lightweight, foldable design allows for easy storage and deployment
- Durable wheels support smooth movement over a variety of surfaces
