

The Stellar GLT is a lightweight tilt-in-space wheelchair designed to promote positioning, mobility, and participation in daily activities. Its low knee-rise design allows users to self-propel or foot propel while benefiting from up to 45° of tilt.

Features

- Converts a wheelchair into a three-wheel all-terrain system
- Improves mobility on grass, gravel, snow, sand, and uneven terrain
- Attaches and removes in seconds after initial setup
- Lightweight aluminum construction for durability and reliability
- Includes a storage perch for convenient transport when not in use
- Helps reduce effort and improve maneuverability outdoors

Specifications

- Installation: Approximately 15 minutes; attaches and removes in seconds
- Frame Material: Aircraft-grade aluminum
- Compatibility: Most rigid and folding wheelchairs
- Footrest Height Requirement: Up to 4.75" (12 cm) standard; custom frames available
- Footrest Angle Requirement: Maximum 12°
- Storage: Includes rear-mounted storage perch for transport when not in use
