

The VitalFlex Elite Care Bed is designed to provide advanced positioning, comfort, and safety for users with higher care needs. Its fully electric operation, wide height range, and residential-style design make it suitable for both home and clinical care environments.

Features

- Fully electric bed with advanced positioning and comfort functions
- Ultra-low and high height range supports safe transfers and caregiving
- One-touch cardiac chair positioning enhances comfort and pressure relief
- Battery backup provides continued operation during power outages
- Residential-style wood finish blends into home environments
- Central braking system and locking handset enhance safety
