

The Fuze M50 is a tilt-in-space manual wheelchair designed to provide advanced pressure relief, improved positioning, and independent mobility. With up to 50° of tilt, a unique Tip Activation system, and a compact six-wheel design, it offers enhanced comfort while maintaining excellent maneuverability.

Features

- Up to 50° tilt for pressure relief and repositioning
- Tip Activation provides up to 4" of front caster clearance for easier obstacle climbing
- Six-wheel design offers excellent maneuverability and stability
- Maintains access to the main wheels for independent propulsion
- Lightweight aluminum frame for durability and strength
- Supports users up to 400 lbs
