

Spex High Contour Cushion

The Spex High Contour Cushion is designed to provide advanced pelvic positioning, enhanced thigh support, and pressure redistribution for wheelchair users with complex postural and seating needs.

Features

- High-contour design provides enhanced thigh and abductor support
- Strategic Positioning Base promotes optimal pelvic alignment and posture
- On-the-spot adjustability for changing seating and positioning needs
- Supports correction of pelvic obliquity, rotation, and tilt variations
- Pressure redistribution design helps reduce peak pressure areas
- Improves stability, comfort, and long-term sitting tolerance
- Suitable for users at risk of pressure injury and skin breakdown
